

THITINUT PUNJUMPOL

Game Developer Intern

064-681-3018 | aom.punjunpol@gmail.com | github.com/Symfall

PORTFOLIO

ABOUT ME

Fourth-year Computer Science student with hands-on experience building games with **Godot** and **Unity**, and AR/VR applications with **A-Frame**, **Three.js**, and **WebXR**. Participated in **Global Game Jam 2026** as game designer and programmer. Eager to join a professional game development team as an intern to learn real-world workflows and contribute to production projects.

EDUCATION

Pibulsongkram Rajabhat University (PSRU) | Phitsanulok, Thailand

2023 - Present

Bachelor of Science in Computer Science (Expected Graduation: May 2027)

GPA: 3.90/4.00

PROJECTS & ACTIVITIES

Sheet Mask Ghost - Global Game Jam 2026

Team project (4 members)

- 2D top-down horror exploration game in Godot: escape ghosts (stunned with masks), collect keys, read notes, and find the exit across 5 areas
- Game design, level layout, and programming (player controller, flashlight, scene transitions)

Adventure Clock

Solo project

- 2D action RPG in Godot (GDScript) with 4 switchable classes (sword, spear, bow, healer) and a 20-level XP and stat-scaling system
- Programmed enemy AI (8+ types, state machine, pathfinding), save/load, cutscenes, and 3 maps

Digimon Digital World VR

Solo project

- Interactive WebXR scene in A-Frame: intro sequence, 3 evolution stations with 14 3D models, Omegamon fusion, and audio controls

Solar System AR Simulation

Solo project

- Markerless AR solar system in A-Frame and AR.js: 9 planet models, fly-to navigation, zoom, and teacher mode with Thai info panels

SKILLS

- **Programming Languages:** JavaScript, C#, Python, GDScript
- **Game Engines & Frameworks:** Unity, Godot, Three.js, A-Frame, AR.js, WebXR
- **Tools:** Git/GitHub, Blender (Basic)
- **Other:** Debugging & testing, teamwork under tight deadlines (Game Jam)

ADDITIONAL INFORMATION

- **Languages:** Thai (Native) | English
- **Certifications:** Game Developer Training, Level 4 (2026), Secure Software Development & Application Security (2026), Software Development Concepts and Testing with Python - Samsung Innovation Campus (2025)
